B Squared™© Best Care Development Tool GHSC V4 Test MFM-AM
MFM/IHS/VHC/GHSC v 11292013 Draft: Not a part of the patient record
B2 = Best Care™© Not for commercial use or distribution MFM

Patient Name:	
Patient MRN:	
Service Date/Time:	
Hopsital:	
Physician:	
Nurse:	
Other Caregivers:	

Best Care Process Score Targets: Refer to top 10 markers from STOMPPIT @ time of eval   **Score**   **NA/?**

		Score	NA/?
1	Optimal patient and family engagement, involvement and care?		
2	Optimal patient care?		
3	All general prophylaxis options engaged?		
4	Organ specific prophylaxis and treatment for primary secondary and tertiary disease prevention?		
5	Documentation in EMR reflects the care provided? (add 10 markers)		
6	QIPI documents recorded and submitted? (add markers)		
7	Staffing adequate? (add delays & other markers for adequate staffing)		
8	Use of physician time: optimal? (add markers for time use 1=100% proper use, 0 = 0% [delays, etc] related to best patient care)		
9	Surge capacity: Do we have adequate backup? (Physician, nurse, other)		
10	Overall process integration? (timely, seamless, teamwork, eficient, calm, quiet, ect.)		
	Score Total = Sum Max of 10.0		

Best Care Outcome Scoring (Interval: Score Since Last Evaluation)   **Score**

	Score
Death caused by care= Sentinel Event	0
Injury caused by care= Sentinel Event	1
Death caused by failed prophylaxis	2
Injury caused by failed prophylaxis	3
Preventable complications of care not reversible	4
Complications of care with residual deficits	5
Complications of care with no residual deficits	6
Complications of treatment with no residual deficits	7
Outcome less than expected	8
Outcome as expected	9
Best possible outcome (better than expected)	10

Best Process Score (Score Total Sum of Process Scores x Best Care Outcome Score)	
Best Outcome Score	
B2 Score (Score Total Sum of Process Scores x Best Care Outcome Score)
